

# Finnsburh Assignment

## Assignment

Convert the first page of Dobbie's edition of *The Battle of Finnsburh* to TEI-compliant XML. (The relevant page has been made available on [Stud.IP](#).)

## XML Standard

Your edition should be in TEI-compliant XML based on our template for critical editions. Although for the present assignment there is only one witness, you will nevertheless use a critical apparatus environment wherever the edited text (i.e. the lemma) diverges from the actual manuscript reading as recorded in the notes. Please note that no manuscript of the fragment survives; instead, today's editions are all based on a printing in George Hicke's 1705 *Linguarum veterum septentrionalium thesaurus grammatic-criticus et archaeologicus* (*Thesaurus* for short).
