Clause Analysis

Divide each of the following sentences into clauses; identify headclause(s) and sub-clause(s); and then, for each clause separately, parse for clause elements S(ubject), V(erb), (O)bject, A(dverbial), and (C)omplement, specifying V_{aux}, $V_{non-fin}$, O_d, O_i, C_s, and C_o where necessary to avoid ambiguity. Example:

Headclause:	S	V	O			
	I	**thought**	**you**	**had**	**already**	**eaten.**
Subclause:			S	V_{aux}	A	$V_{non-fin}$
			you	**had**	**already**	**eaten.**

1. While you dallied, I made us lunch.

2. Are you sure or will you reconsider?

3. I am leaving, as no one has need of me here.

4. No one has seen Eva since she won the lottery.
